Aerospace America

Index to AA
Vol. 31, Nos 1-12

Subjects

AIRCRAFT DESIGN AND TECHNOLOGY

Sensing a change in the wind, Jan., p. 20.
Developing the MD Explorer, April, p. 31.
Comanche air-frame design—the PDT approach, April, p. 22.
Will aerospace plane development go international?, July, p. 16.
Will the C-130 replacement survive the politicians?, July, p. 10.
Engineering simulators enhance 777 development, Aug., p. 30.
Removing the risk from rotocraft testing, Aug., p. 34.
Aerospace '93: Air transportation, Dec., p. 26.
Aerospace '93: Aircraft operations, Dec., p. 29.
Aerospace '93: Digital avionics, Dec., p. 46.
Aerospace '93: Ground testing, Dec., p. 75.
Aerospace '93: V/STOL, Dec., p. 32.
Aerospace '93: Lighter-than-air, Dec., p. 28.
Aerospace '93: Structures, Dec., p. 72.
Aerospace '93: General aviation, Dec., p. 31.
Aerospace '93: Applied aerodynamics, Dec., p. 12.
Aerospace '93: Aeroacoustics, Dec., p. 18.

AVIONICS AND ELECTRONICS

Finding fault with avionics, Jan., p. 32.
Digitally mastered maintenance for avionics, Feb., p. 48.
Aerospace '93: Guidance, navigation, and control, Dec., p. 16.

COMMUNICATIONS

Aerospace '93: Communications, Dec., p. 38.

COMPUTERS AND SOFTWARE

Airspace redesign: Making the GRADE, Jan., p. 38.
The CST scene in Germany and Sweden, Feb., p. 44.
CST gives aircraft industry a lift, Feb., p. 32.
Aerospace systems push the CST envelope, Feb., p. 36.
CST and rotorcraft: Expanding the view, Feb., p. 28.
Europe adapts CST to its needs, Feb., p. 40.
NASA CST aids U.S. industry, Feb., p. 20.
Structuring the future of aerospace, Feb., p. 14.
The outlook for CST, Feb., p. 5.
Making the most of CAD/CAM/CAE tools, June, p. 5.
STEPs to better product data exchange, June, p. 30.
Keeping ahead of the CAD/CAM curve, June, p. 20.
Networking opens windows on a CAD/CAM revolution, June, p. 38.
CAD/CAM/CAE reshapes engineering processes, June, p. 16.
A glimpse at rapid prototyping technologies, June, p. 28.
The long arm of CAD/CAE, June, p. 34
Finite element analysis: A 3-D view, June, p. 22.
Combat simulations from a distance, Aug., p. 38.
Engineering simulators enhance 777 development, Aug., p. 30.
Visual systems: Generating a new reality, Aug., p. 26.
Red-hot simulation, Aug., p. 42.
Removing the risk from rotocraft testing, Aug., p. 34.
Networks extend simulation's reach, Aug., p. 22.
Making the most of simulation's assets, Aug., p. 5.
Flight simulation: An overview, Aug., p. 14.
Flight research simulation takes off, Aug., p. 18.
CASHE lightens the data load, Sept., p. 36.
Planning ahead for launch failures, Sept., p. 41.
Simulation considers the human factors, Oct., p. 38.
Aerospace '93: Design engineering, Dec., p. 76.
Aerospace '93: Interactive computer graphics, Dec., p. 78.
Aerospace '93: Software systems, Dec., p. 41.
Aerospace '93: Computer systems, Dec., p. 42.
Aerospace '93: C3I, Dec., p. 44.
Aerospace '93: Multidisciplinary design optimization, Dec., p. 30.

ECONOMICS

Industry update: Dealing with the decline, Oct., p. 12.
Japan seeks remedies for aerospace decline, Nov., p. 28.
Heeding the wake-up call, Dec., p. 6.

INSTRUMENTATION AND TECHNOLOGY

Sensing a change in the wind, Jan., p. 20.
COBE looks back to the big bang, Jan., p. 26.
Japan stresses multisatellite remote sensing, March, p. 28.
Stacking up the advantages of platelets, March, p. 38.
Faster rocket X-rays made crystal clear, April, p. 42.
GPS positions itself for a starring role, May, p. 32.
Tethering a new technology, May, p. 14.
A glimpse at rapid prototyping technologies, June, p. 28.
Correcting Hubble's vision, July, p. 32.
Red-hot simulation, Aug., p. 42.
Magnetic levitation for the masses, Sept., p. 30
Magnetic bearings grow more attractive, Oct., p. 42.
Aerospace '93: Aerodynamic measurement technology, Dec., p. 15.
Aerospace '93: Survivability, Dec., p. 77.
Aerospace '93: Space operations and support, Dec., p. 63.
Aerospace '93: Support systems, Dec., p. 40.
Aerospace '93: Fluid dynamics, Dec., p. 20.
Aerospace '93: Aerodynamic decelerators, Dec., p. 19.

INTERNATIONAL

Japan's defense aircraft sector faces cutbacks, Jan., p. 16.
Europe focuses R&D spending, Jan., p. 15.
Envisioning a world space agency?, Jan., p. 14.
The CST scene in Germany and Sweden, Feb., p. 44.
Europe adapts CST to its needs, Feb., p. 40.
Eurofighter survives, Feb., p. 10.
Japan stresses multisatellite remote sensing, March, p. 28.
East Europe's aircraft builders look West, March, p. 34.
Europe's aerospace designers face tough new environmental targets, March, p. 43.
Europeans to be major partners in 800 seater development, April, p. 12.
Europe's ATC plan: Panacea or placebo?, May, p. 10.
Japanese firms face sharp defense procurement decline, June, p. 12.
Sales, not subsidies, are the sticking point, June, p. 10.
What can Japan teach the U.S. about composites?, July, p. 37.
U.S./CIS eye joint nuclear rocket venture, July, p. 28.
Japan's ISAS pursues "independent" agenda, July, p. 13.
Will aerospace plane development go international?, July, p. 16.
Will the C-130 replacement survive the politicians?, July, p. 10.
Europe's civil manufacturers fear the worst is not yet over, Aug., p. 8.
Battle of the super jumbos?, Aug., p. 10.
The ballistic missile club widens, Sept., p. 8.
Interest in civil space spans globe, Sept., p. 10.
Raising the volume on a noisy issue, Oct., p. 8.
Saab-Scania Combitech: Finding its niches, Oct., p. 10.
Far East nurtures aerospace ambitions, Nov., p. 8.
Japan seeks remedies for aerospace decline, Nov., p. 28.
Russians showcase Mir technologies, Nov., p. 14.
Flight simulation flourishes in China, Nov., p. 12.
A year Italy will want to forget, Dec, p.6.
Heeding the wake-up call, Dec., p. 6.
Winners and losers from the bottom up,Dec., p. 6.

MANAGEMENT

Capturing industry's vanishing expertise, March, p. 10.
Managing the world's air traffic, March, p. 14.
Rocket engine development, April, p. 28.
An evolutionary approach, April, p. 25.
CE: Bright spot on a dim horizon, April, p. 5.
Developing the MD Explorer, April, p. 31.
Comanche air-frame design—the PDT approach, April, p. 22.
CE at General Dynamics, April, p. 34.
CE: Engineering a change in the design process, April, p. 18.
Space Station Freedom, April, p. 38.
Europe's ATC plan: Panacea or placebo?, May, p. 10.
Will aerospace plane development go international?, July, p. 16.
Simulation considers the human factors, Oct., p. 38.
Space operations and the human factor, Oct., p. 18.
Human factors in underwater systems, Oct., p. 34.
Human factors engineering, Oct., p. 5.
Human engineering for the space station, Oct., p. 22.
The human factor in aerospace maintenance, Oct., p. 26.
The human/robot interface, Oct., p. 30.
Reinventing NASA, Nov., p. 5.
Aerospace '93: Technical information, Dec., p. 36.
Aerospace '93: Multidisciplinary design optimization, Dec., p. 30.

MATERIALS

Sealing the fate of electronics: Ceramics or plastics?, Jan., p. 42.
High-temperature materials warm up for debut, March, p. 18.
Birth of the betas, May, p. 36.
TMC fabrication: Gearing up for uncertainty, June, p. 42.
What can Japan teach the U.S. about composites?, July, p. 37.
Beyond steel: TMCs for lighter landing gear, July, p. 42.
Weaving new strength into composites, Sept., p. 26.
Beating swords into golf clubs, Nov., p. 18.
Aerospace '93: Materials, Dec., p. 74.

MILITARY SYSTEMS

The case for Aurora, July, p. 11.
Combat simulations from a distance, Aug., p. 38.
The ballistic missile club widens, Sept., p. 8.

MISSILES

The ballistic missile club widens, Sept., p. 8.
Ring wing aids missile maneuverability, Nov., p. 42.
Aerospace '93: Missiles, Dec., p. 64.

POLICY

Focus on the future, Jan., p. 5.
Europe focuses R&D spending, Jan., p. 15.
Envisioning a world space agency?, Jan., p. 14.
Space-launch alphabet soup, March, p. 5.
Changes in Congress create uncertainties for aerospace, April, p. 13.
The aerospace industry and our planet, May, p. 5.
Launches and the environment: Lessons learned, May, p. 30.
Sales, not subsidies, are the sticking point, June, p. 10.
Competitiveness and technology policy, July, p. 5.
Raising the volume on a noisy issue, Oct., p. 8.
Reinvigorating the air transportation industry, Oct., p. 15.
Reinventing NASA, Nov., p. 5.
Aerospace '93: Society and aerospace technology, Dec., p. 35.
Aerospace '93: Legal aspects, Dec., p. 34.
Heeding the wake-up call, Dec., p. 6.

PROPULSION AND POWER

Rocket engine development, April, p. 28.
Aerospace '93: Nuclear thermal propulsion, Dec., p. 54.
Aerospace '93: Solid rockets, Dec., p. 53.
Aerospace '93: Aerospace power, Dec., p. 55.
Aerospace '93: Hybrid rockets, Dec., p. 59.
Aerospace '93: Air breathing propulsion, Dec., p. 50.
Aerospace '93: Propellants and combustion, Dec., p. 58.
Aerospace '93: Electric propulsion, p. 52.
Aerospace '93: Thermophysics, Dec., p. 25.
Aerospace '93: Liquid propulsion, Dec., p. 56.
Aerospace '93: Terrestrial energy, Dec., p. 57.

ROBOTICS

The long arm of CAD/CAE, June, p. 34
Finding the path to a better Mars rover, Sept., p. 12.
The human/robot interface, Oct., p. 30.
Aerospace '93: Space automation and robotics, Dec., p. 62.

SPACE AND ATMOSPHERIC SCIENCE

COBE looks back to the big bang, Jan., p. 26.
SEI science: Measuring the return, March, p. 22.
Magellan mapping update: A matter of gravity, May, p. 20.
Designing for the space environment, May, p. 26.
Correcting Hubble's vision, July, p. 32.
A new MAP for Mars, Sept., p. 20.
Back from the future, Nov., p. 32.
Fueling a revolution in space processing, Nov., p. 38.
Aerospace '93: Life sciences, Dec., p. 66.
Aerospace '93: Space processing, Dec., p. 67.
Aerospace '93: Space sciences and astronomy, Dec., p. 68.
Aerospace '93: Astrodynamics, Dec., p. 17.
Aerospace '93: Aerospace maintenance, Dec., p. 49.
Aerospace '93: Plasmadynamics and lasers, Dec., p. 14.
Aerospace '93: Atmospheric flight mechanics, Dec., p. 22.
Aerospace '93: Balloons, Dec., p. 24.
Aerospace '93: Structural dynamics, Dec., p. 79.
Aerospace '93: Space systems, Dec., p. 60.
Aerospace '93: Atmospheric environment, Dec., p. 23.

SPACE STATION

Space Station Freedom, April, p. 38.
Space station schizophrenia, Sept., p. 5.
Human engineering for the space station, Oct., p. 22.

Aerospace America

Aerospace '93: Thermophysics, Dec., p. 25.
Aerospace '93: Liquid propulsion, Dec., p. 56.
Aerospace '93: Terrestrial energy, Dec., p. 57.

ROBOTICS

The long arm of CAD/CAE, June, p. 34
Finding the path to a better Mars rover, Sept., p. 12.
The human/robot interface, Oct., p. 30.
Aerospace '93: Space automation and robotics, Dec., p. 62.

SPACE AND ATMOSPHERIC SCIENCE

COBE looks back to the big bang, Jan., p. 26.
SEI science: Measuring the return, March, p. 22.
Magellan mapping update: A matter of gravity, May, p. 20.
Designing for the space environment, May, p. 26.
Correcting Hubble's vision, July, p. 32.
A new MAP for Mars, Sept., p. 20.
Back from the future, Nov., p. 32.
Fueling a revolution in space processing, Nov., p. 38.
Aerospace '93: Life sciences, Dec., p. 66.
Aerospace '93: Space processing, Dec., p. 67.
Aerospace '93: Space sciences and astronomy, Dec., p. 68.
Aerospace '93: Astrodynamics, Dec., p. 17.
Aerospace '93: Aerospace maintenance, Dec., p. 49.
Aerospace '93: Plasmadynamics and lasers, Dec., p. 14.
Aerospace '93: Atmospheric flight mechanics, Dec., p. 22.
Aerospace '93: Balloons, Dec., p. 24.
Aerospace '93: Structural dynamics, Dec., p. 79.
Aerospace '93: Space systems, Dec., p. 60.
Aerospace '93: Atmospheric environment, Dec., p. 23.

SPACE STATION

Space Station Freedom, April, p. 38.
Space station schizophrenia, Sept., p. 5.
Human engineering for the space station, Oct., p. 22.

SPACE TRANSPORTATION

Space-launch alphabet soup, March, p. 5.
Launches and the environment: Lessons learned, May, p. 30.
U.S./CIS eye joint nuclear rocket venture, July, p. 28.
Delta Clipper: Design for supportability, July, p. 24.
Single stage rocket technology: Here today, July, p. 20.
Planning ahead for launch failures, Sept., p. 41.
Mars vehicle design: The fourth generation, Sept., p. 16.
The case for Shuttle II, Nov., p. 24.
Aerospace '93: Space transportation, Dec., p. 70.

SPACECRAFT

COBE looks back to the big bang, Jan., p. 26.
Japan stresses multisatellite remote sensing, March, p. 28.
GPS positions itself for a starring role, May, p. 32.
Magellan mapping update: A matter of gravity, May, p. 20.
Tethering a new technology, May, p. 14.

FACE TO FACE

with Eugene E. Covert, Jan., p. 6.
with Benjamin Cosgrove, Feb., p. 6.
with Daniel Fink, March, p. 6.
with James Hansen, April, p. 6.
with Wolfgang Demisch, June, p. 6.
with Don Fuqua, July, p. 6.
with Rep. Patricia Schroeder, Aug., p. 5.
with Wesley Harris, Sept., p. 6.
with Rep. Louis Stokes, Oct., p. 6.
with John Gibbons, Nov., p. 6.

A LETTER FROM

Bell Helicopter, Jan., p. 10.
Deutsche Aerospace, April, p. 8.

SPACE ECONOMICS

Joel S. Greenberg and Henry R. Hertzfeld, Editors

This new book exposes scientists and engineers active in space projects to the many different and useful ways that economic analysis and methodology can help get the job done. Whether it be through an understanding of cost-estimating procedures or through a better insight into the use of economics in strategic planning and marketing, the space professional will find that the use of a formal and structured economic analysis early in the design of a program will make later decisions easier and more informed.

Chapters include: Financial/Investment Considerations, Financial/Investment Analysis, Cost Analysis, Benefit/Cost and Cost Effectiveness Models, Economics of the Marketplace, Relationship of Economics to Major Issues
